

i am a ham radio operator i have been thinking about upgrading to general class, i have read some articles on this broadband over the power lines, if this happen that mean any frequency in the hf band be affected. consider this also the CB radio 11 meter be affected as well . - any one that has a proable phone within the 40- 50 mzh will be in this affected area as well, please reconsider this action it will be a massive problem for hf and some low band vhf.
